#### New Tschorn 3D Tester video

*The champion of the German Skills in milling presents Tschorn's 3D Tester with all its advantages.*

Patrick Aiple, the Champion of the German skills, Vice Champion of the European skills as well as 6<sup>th</sup> in the World Skills in CNC milling, plays the star role in Tschorn's new 3D Tester product video. General manager Ralf Tschorn: „Patrick Aiple has participated and won numerous competitions with our 3D Testers. That's why he is the ideal cast for the new product film. Nobody knows the advantages of our 3D Tester better than he does.“

On two days in February, Patrick Aiple's story of how he came to the Tschorn 3D Testers has been filmed: the motivation to look for another measuring instrument was for Patrick Aiple in the first instance that he could not probe precisely enough with conventional 3D Testers. Additionally, he did not have any overview in the machine. Although he was able to help himself with conventional mechanical edge finders, this solution was not competitive.

So Aiple came across Tschorn's 3D Tester and has since then been equipped by Ralf Tschorn. "We are pleased to sponsor a young, enthusiastic CNC milling talent - and we are very pleased that Patrick Aiple was available for our new 3D Tester product video", Tschorn says.
